

Query rewriting

# The Ontology

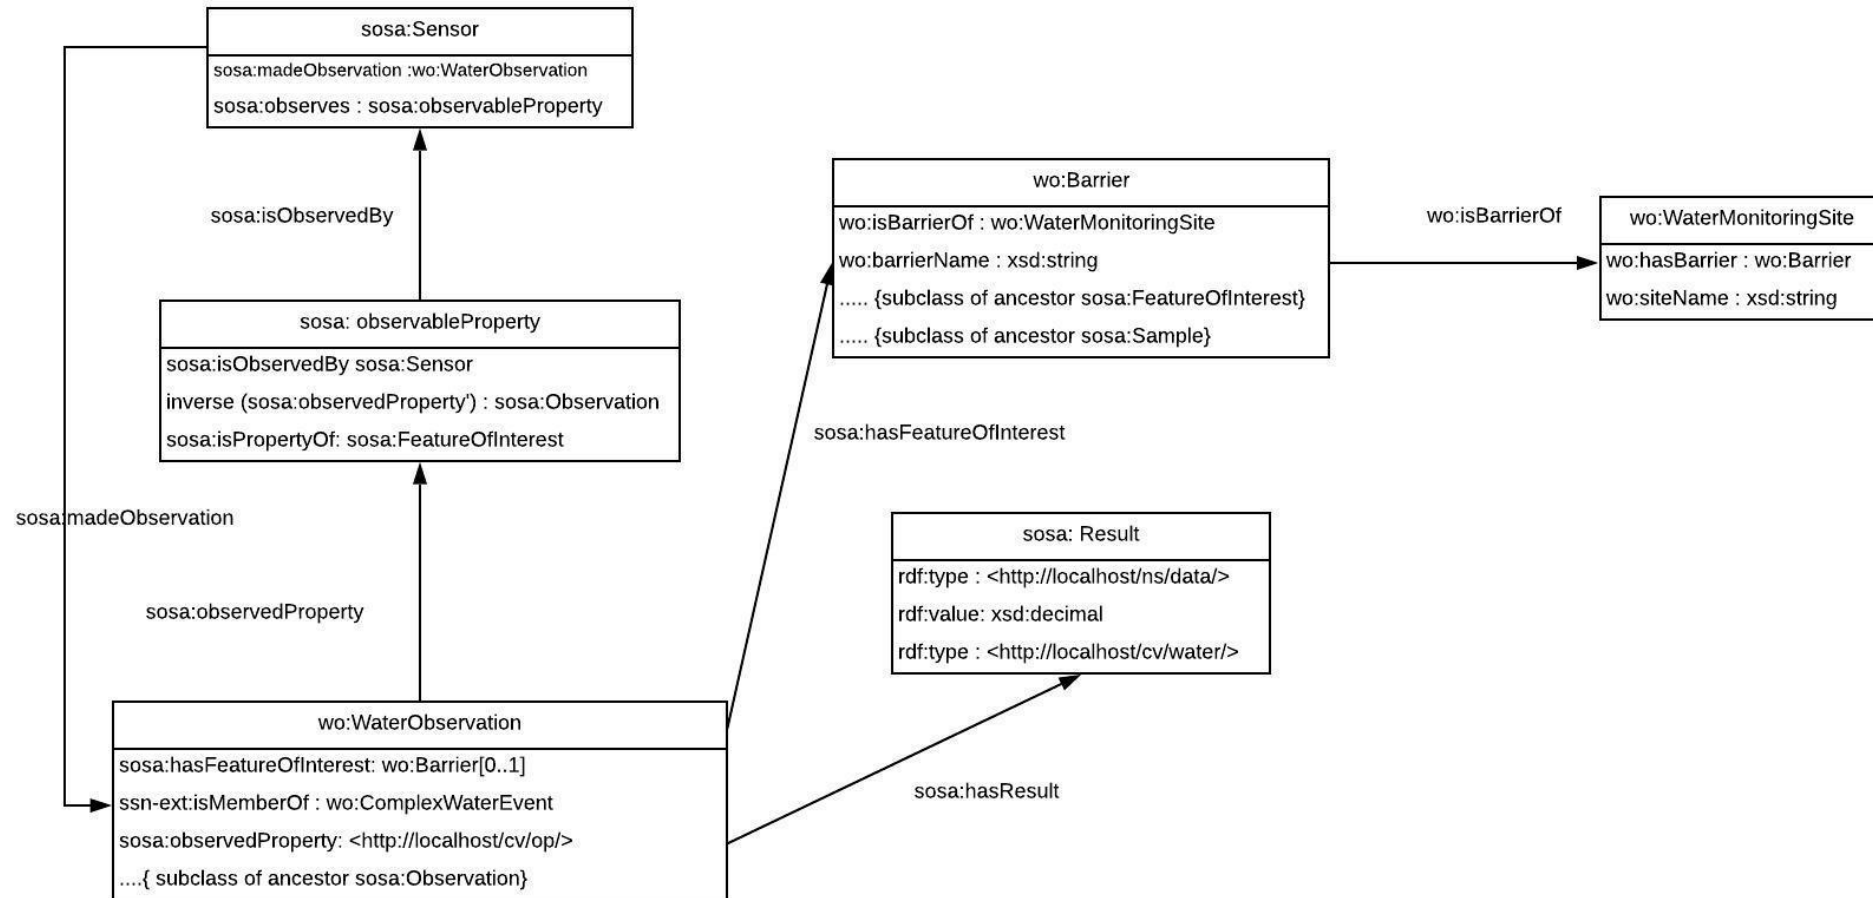

[HTTPS://GITHUB.COM/SUNYI000/WATER-ONTOLOGY](https://github.com/SUNYI000/WATER-ONTOLOGY)

- Extends existing ontologies
  - Ssn/sosa ontology
  - ssn-ext
- control vocabs for water monitoring

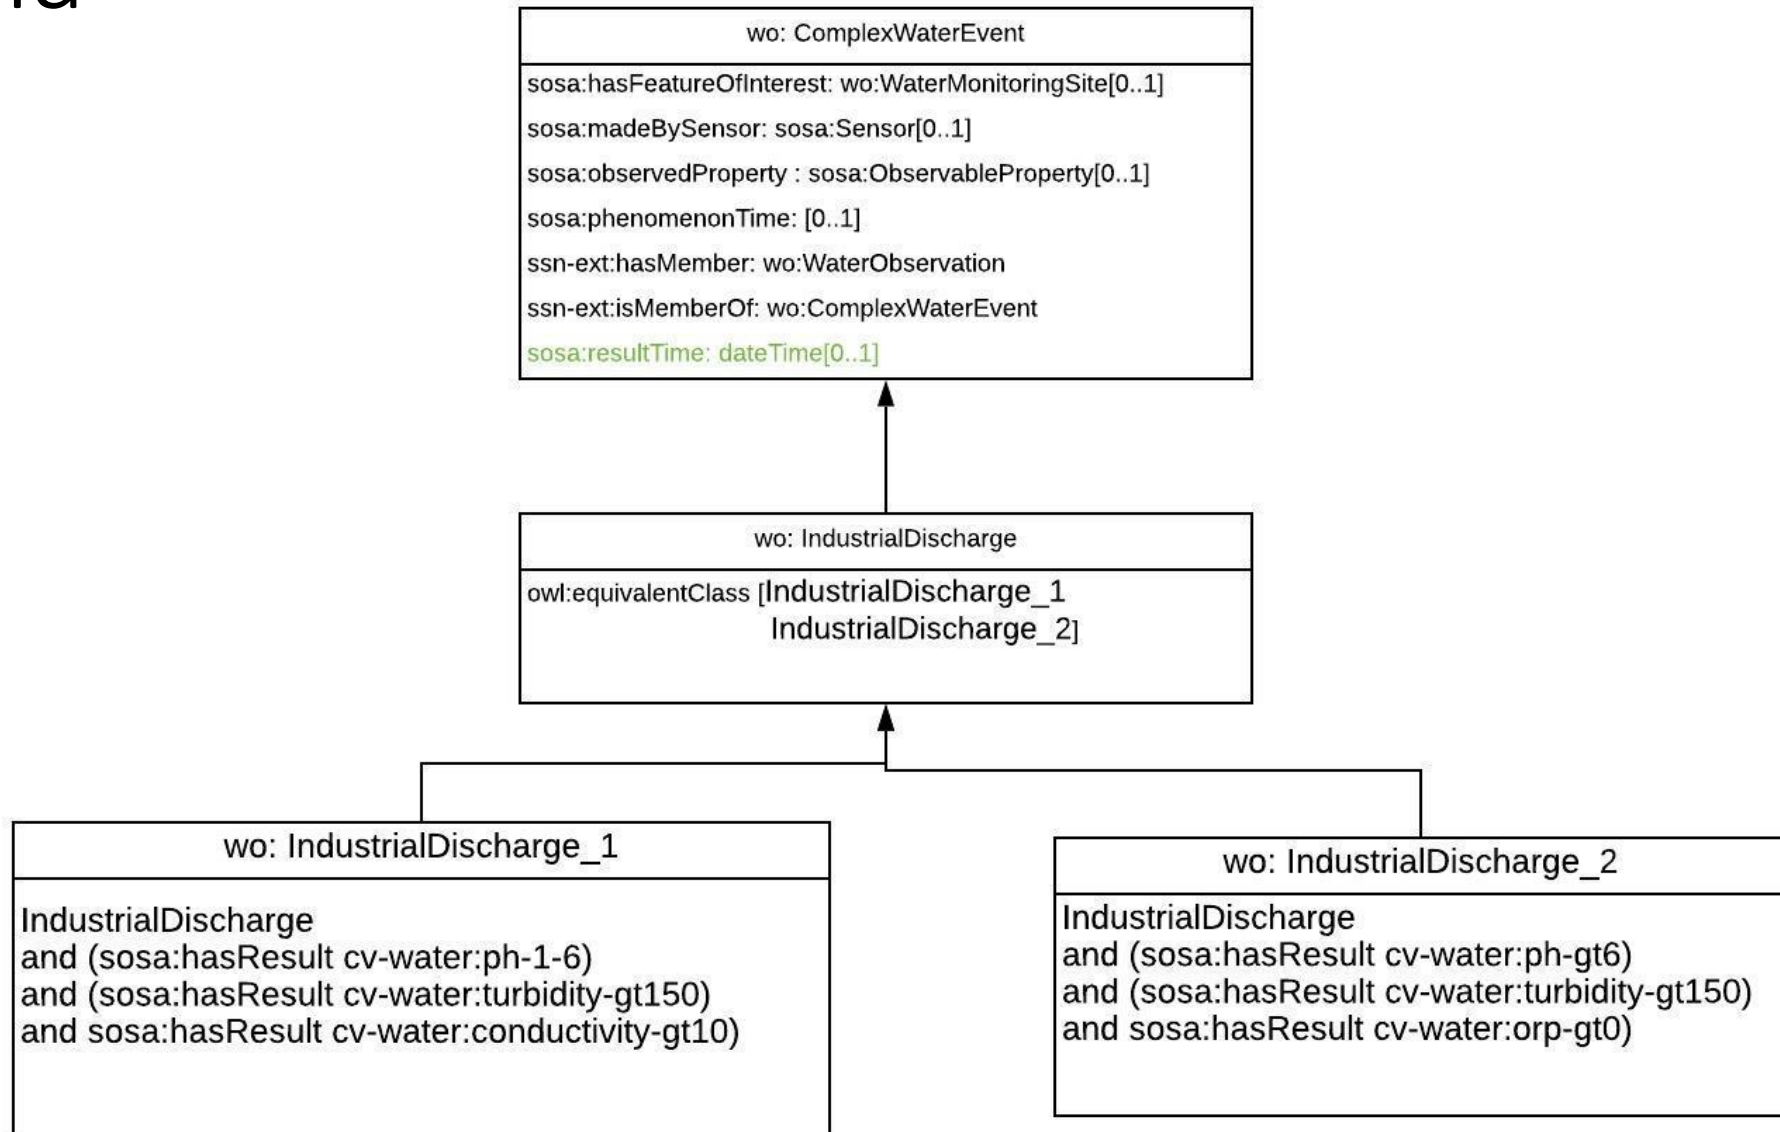

# schema

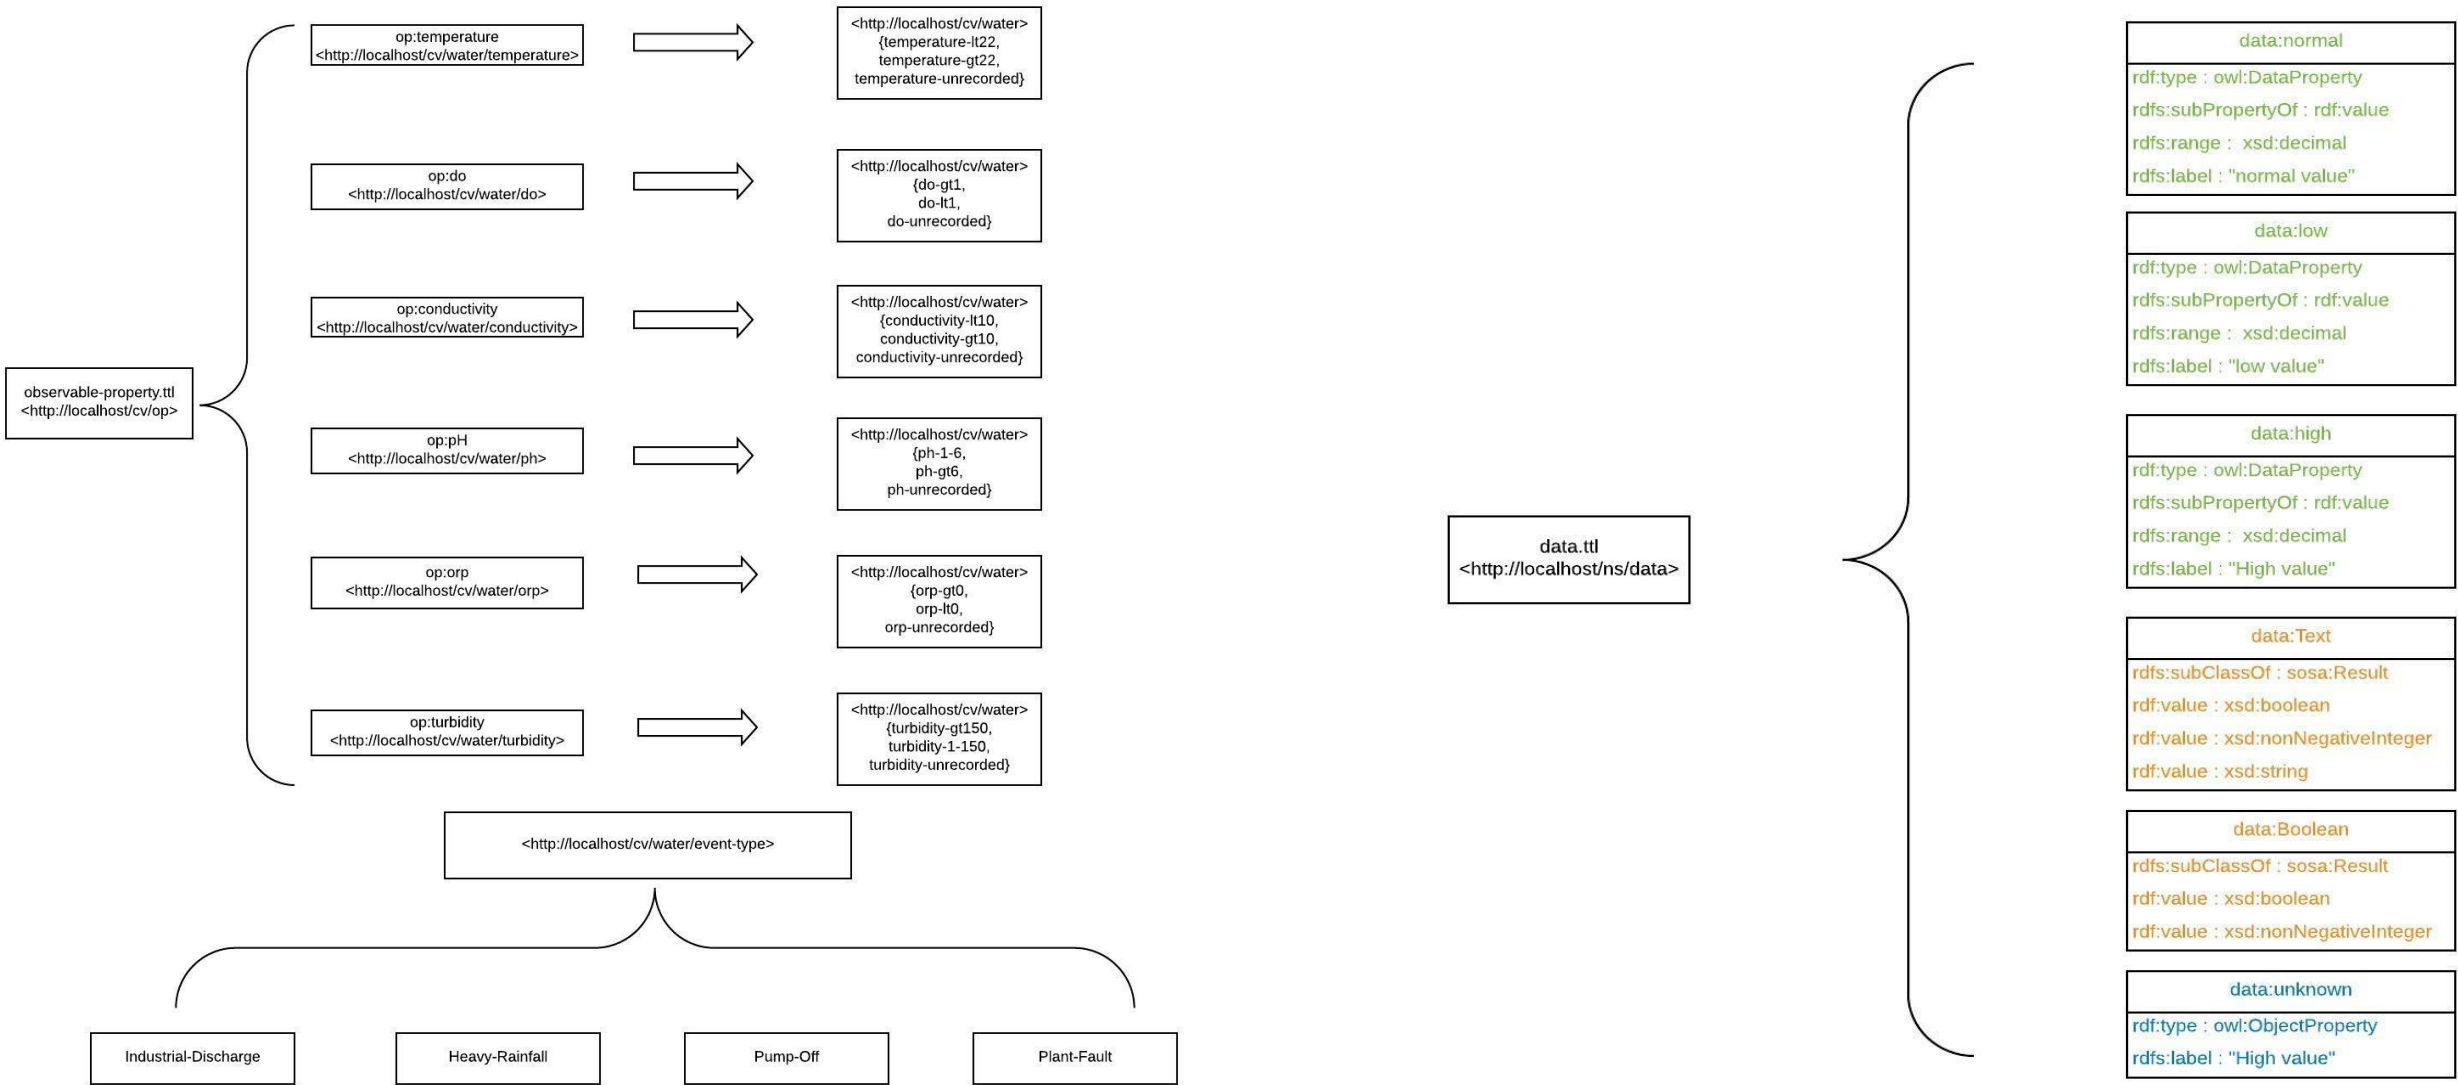

# Schema

# schema

# Data & Control vocabs

# Complex Events

- Industrial discharge
- Heavy rainfall
- Pump off
- Plant fault

# Industrial discharge

- low ph, high turbidity, high conductivity (IndustrialDischarge\_1)
- high ph, high turbidity, low orp (IndustrialDischarge\_2)

# Example High level queries

IndustrialDischarge = IndustrialDischarge\_1 OR IndustrialDischarge\_2

# Rewriting IndustrialDischarge

- IndustrialDischarge\_1= IndustrialDischarge  
and (sosa:hasResult cv-water:ph-1-6)  
and (sosa:hasResult cv-water:turbidity-gt150)  
and sosa:hasResult cv-water:conductivity-gt10)
- IndustrialDischarge\_2= IndustrialDischarge  
and (sosa:hasResult cv-water:ph-gt6)  
and (sosa:hasResult cv-water:turbidity-gt150)  
and sosa:hasResult cv-water:orp-gt0)
